

Must Know Facts About Mailing List Data Card

An email data card is an informative document containing:-

- ✓ Total counts
- ✓ Count by region
- ✓ Count by industry
- ✓ Count by department
- ✓ Count by revenue size
- ✓ The email address
- ✓ List name
- ✓ Demographics data
- ✓ Pricing
- ✓ Update schedule and many more...

You should analysis the data card based on your campaign objective:

- ✓ When was the data last verified?
- ✓ What are the sources of data?
- ✓ Are the contacts opt-in?
- ✓ Are the segments given on the data card relevant for your campaign?
- ✓ Is the data grouped by different email clients?
- ✓ If you campaign is send to different countries, then get counts based on each location.
- ✓ What fields are given for each record?

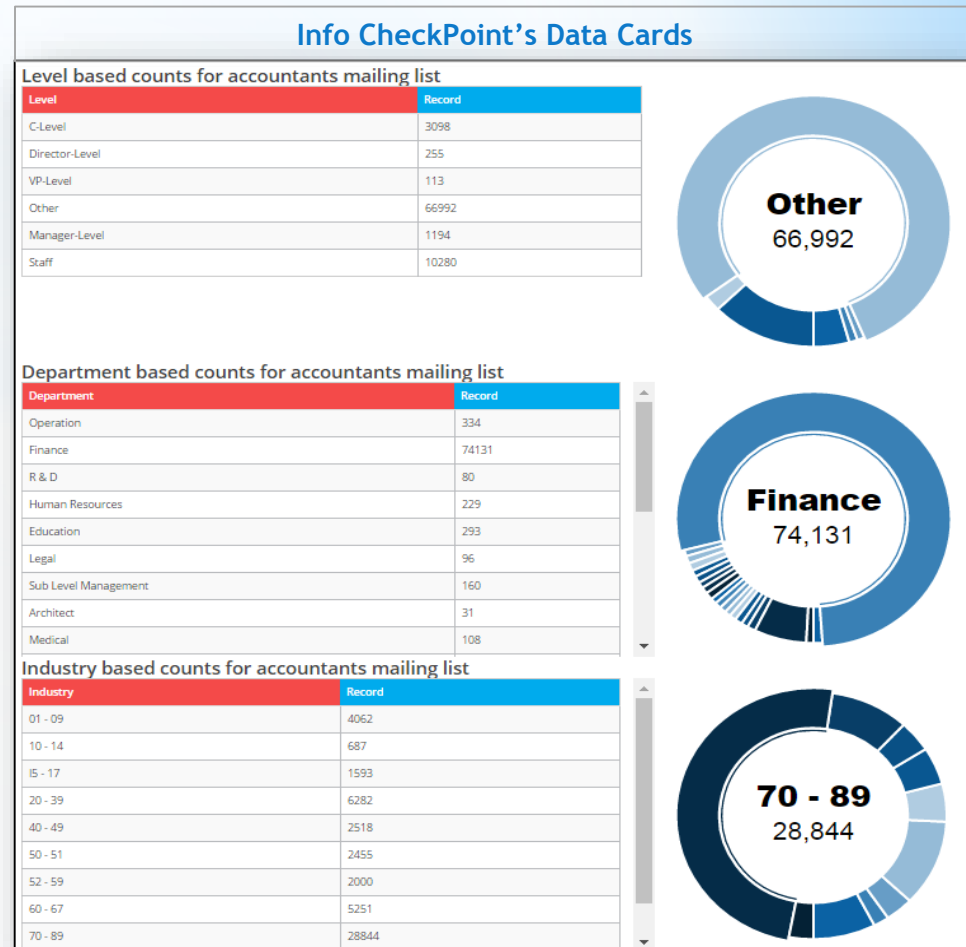

Data cards give you intelligence that you won't find in other media planning tools:

- ✓ Eliminates cold calls
- ✓ Drives warm leads
- ✓ Easy to select mailing lists from multiple data card vendors
- ✓ Summarizes the significant details about a specific mailing list
- ✓ Time saving
- ✓ Best suitable option for direct email marketing
